...and so it begins.

The question should be do we have a role in *waste management from tailings* dams and mines. From a RCRA subtitle C perspective, generally no, because of Bevill. Hate to make a broad statement for external use w/out a bit of wordsmithing as to the Question, and a review of the proposed Answer by folks who know more.

These wastes are still solid wastes and we have authorities such as 7003. If

All,

Do we have any role in tailing dams and mines? I'm assuming these are all Bevill, but OSRTI wanted to double check with us.

Jeremy,

I wanted to pass this along in case your office has anything you wish to contribute.

Thanks

Melissa

Melissa: I want to follow the correct process on press inquiries related to the Aminos River spill but don't want to lose time either. So here's an inquiry we received from OPA. We may also get it via the EOC.

Thanks, nancy

All, I've sent this inquiry to Region 8 already, but it looks as though OSWER might want to take a look at the first two questions. Please let me know.

If we could get a response by COB Today, the reporter could run the story in tomorrow's paper. Please advise. Thanks, R.

Subject: Guardian media enquiry

Hi Robert,

I'm a journalist with the Guardian writing a piece on the release from the Gold King Mine in Colorado.

I have a few questions on the background of the situation. Please do your best to answer them all.

On the general state of tailings dams and mines. How many such storage facilities are there across the country? How does the EPA monitor the maintenance and condition of mines and dams that are holding contaminated water? Are abandoned mines, like Gold King, monitored?

It has been reported that the EPA has been trying to designate the area as a superfund area for some time. When was the idea first floated? Why was it unsuccessful? Does the EPA believe the spill would have occurred regardless of the lack of superfund designation? Would that have changed the way the clean up was undertaken (ie would there have been more money available and therefore less likelihood of a failure?)?

Best,

Karl
